Subject: Application for Data Scientist/Analyst Position

Dear Hiring Manager,

I am writing to express my interest in the position of Data Scientist/Analyst Position at your organization. With a strong background in data analysis, machine learning, and supply chain optimization, I am eager to contribute my expertise to drive data-driven decision-making and enhance business outcomes.

In my role as a **Decision Science Analyst at Accenture**, I developed machine learning models for **store delivery optimization**, achieving 95% accuracy in clustering locations to enhance resource utilization. Additionally, I built an **inventory analytics platform** leveraging Python and SQL, integrating rule-based methods and machine learning to automate data pipelines and generate actionable insights. My hands-on experience with **Power BI, Excel, and data storytelling** has enabled me to translate complex datasets into meaningful business recommendations.

Previously, as a **Knowledge Consulting Intern at McKinsey & Company**, I developed a **Python-based tool** for e-commerce supply chain optimization, improving last-mile delivery efficiency for North American omnichannel retailers. My exposure to both **strategic decision-making and technical implementation** allows me to bridge the gap between data science and business needs effectively.

I am particularly drawn to your organization because of its commitment to **innovation and data-driven solutions**. My proficiency in **Python, SQL, Power BI, and machine learning** aligns well with the role's requirements, and I am excited about the opportunity to apply my skills in a dynamic and collaborative environment.

I welcome the opportunity to discuss how my skills and experience align with your team's needs. Please find my resume attached for your reference. I look forward to the possibility of contributing to your organization and am available at your convenience for an interview.

Thank you for your time and consideration.

Best regards,
N. Sai Dhanush
